Target Cellulite – Silhouette Contouring Complex

Product description

Cellulite affects around 90% of women, often due to hormonal factors such as oestrogen, which triggers fat cell activity and fluid retention. This results in fat, fluids, and toxins becoming trapped beneath the skin, creating the characteristic “orange peel” effect.

This advanced silhouette-contouring treatment not only targets cellulite but also integrates anti-ageing technology, improving skin quality and firmness. The powerful synergy of natural actives stimulates microcirculation, drains excess fluid, reduces fat storage, and visibly improves skin elasticity, leaving the body smoother, firmer, and more sculpted.

Directions for use

AM or PM:

Cleanse the body of any cream and oil. If the body is warm following a bath or shower, this aids penetration.

Massage briskly a layer of Complex to all areas prone to cellulite – thighs, buttocks, abdomen and inner knees. Then very gently ensure areas of lymph drainage (where toxins are eliminated) are covered, targeting mainly behind knees, groin, armpits, up to the neck.

Leave treatment on. One may apply Slimming Sculpting Solution to target areas over the top.

Note: MUST NOT be combined with any other product range.
