

New Expression-365

Key Ingredients That Work

- Advanced Peptides – Smooth crow's feet, relax expression lines, and help prevent wrinkle formation.
- Myo-Relaxing Complex – Provides safe, non-invasive muscle relaxation for a lifting effect.
- Brightening Actives – Fade under-eye dark circles and improve skin clarity.
- Decongesting Botanicals – Reduce puffiness and refresh tired eyes.
- Tensor Film Technology – Creates an instant tightening and smoothing effect.
- Slow-Release Delivery System – Ensures 24-hour residual benefits for long-lasting results.

New Expression-365

Product description

This next-generation eye treatment is formulated with advanced peptides and smart delivery technology to target all signs of under-eye aging. It visibly reduces crow's feet, puffiness, and dark circles while delivering an immediate lifting and smoothing effect. With continuous release of actives, the delicate eye contour stays revitalized, firmer, and more youthful-looking around the clock.

Directions for use

AM & PM: Cleanse with RégimA and apply Revolution-EYZ serum to the upper eye lids. Then apply a small amount of Under Eye Fix to the whole under eye area, crow's feet and between the eyebrows on frown lines. (Do not apply to upper eyelids) Because there is a cumulative effect, if applied twice daily one receives extra benefit. The combination of RégimA Zone Revolution-EYZ and New Expression-365 Under Eye Fix is highly recommended.
